Facilities Supported

\$2M+

Stock Value Managed

PROFESSIONAL SUMMARY

Senior Supply Chain & Logistics Manager with 10+ years managing end-to-end supply chains across complex humanitarian settings. Directed procurement, warehousing, and distribution of pharmaceuticals (including cold chain: human insulin), vaccines, medical equipment, haemodialysis

consumables, agricultural supplies, PPE, and emergency relief items across 21+ facilities in 5 Yemeni governorates.

Mobilized between Yemen and Djibouti to optimize operations, recruit and train staff, and ensure continuity. Provided remote oversight for 5 sub-delegations and served as primary liaison with Ministry of Health, Supreme Board of Drugs, Customs Authority, and third-party logistics providers.

KEY ACHIEVEMENTS

Supply Chain Optimization

Reduced procurement-to-delivery lead time by 30% through pipeline monitoring and supplier coordination.

ERP Implementation

Implemented JD Edwards Oracle for demand planning, reducing inventory discrepancies by 25%.

Inventory Accuracy

Achieved 99.5% inventory accuracy for stocks valued at over \$2 million.

Quality Management Systems

Established comprehensive QMS including SOPs, supplier validation, and CAPA systems.

◆ Supplier Management

Conducted market assessments and qualified over 50 suppliers.

◆ Risk Management

Reduced expiry-related losses by 15% through proactive monitoring.

PROFESSIONAL EXPERIENCE

Supply Chain & Logistics Manager

International Committee of the Red Cross (ICRC)

📍 Yemen / Djibouti

 May 2013 – Nov 2023

End-to-End Supply Chain: Directed operations supporting 21+ facilities across 5 governorates.

Cross-Border Mobilization: Deployed between Yemen and Djibouti to optimize operations.

ERP Implementation: Led JD Edwards Oracle implementation for automated replenishment.

Quality Management: Established QMS including SOPs and CAPA systems.

Procurement: Led RFQs, ITBs, tender evaluations, and contract negotiations.

Government Liaison: Primary liaison with Ministry of Health and Customs Authority.

Emergency Response: Managed logistics for cholera outbreaks and COVID-19 response.

SUPPLY CHAIN RESILIENCE

1. Context of Systemic Collapse

In active conflict environments like Yemen, standard supply chain theories break down completely. A decade of crisis created total failure of public health providers and severe import limitations.

2. Three-Tiered Logistics Framework

Strategic Proximity: Regional warehouse network protected supply pipelines.

Predictive Precision: MRP principles integrated into ERP systems.

Agility: Flexible ad-hoc supply mechanism for emergencies.

3. Institutional Impact

A supply chain built on predictive data and agile execution can ensure survival even when national infrastructure collapses.
